Email: adityanandan450@gmail.com
Mobile: +91-7717341716

Skills

Languages: Python, C, Java, SQL, PL/SQL
Frameworks: Pandas, NumPy, Seaborn, Matplotlib, Pygame, Scikit-learn
Tools/Platforms: Excel, Git, Tableau, Jupyter Notebook
Soft Skills: Leadership, Collaborative, Problem Solving, Adaptability, Project Management

Training

Lovely Professional University | Code Query – PL/SQL & Data Science Bootcamp *May'25 – Jul'25*

- Mastered PL/SQL programming by developing procedures, triggers and cursors to streamline database operations.
- Designed and optimized database schemas with primary/foreign key relationships and constraints for structured data handling.
- Implemented foundational Machine Learning Models (Regression, Classification, Clustering) using Python.
- Applied ML concepts to real-world datasets, integrating database systems with pipelines.

Projects

E-Commerce Sales Data Analysis | *Python, Pandas, NumPy, Matplotlib, Seaborn* *Apr'24*

- Cleaned and processed 50k+ retail transactions to remove duplicates, missing values, and inconsistencies.
- Performed EDA to identify seasonal purchase trends, customer demographics, and top-selling products.
- Visualized insights using bar charts, heatmaps, and time-series plots; highlighted a 25% surge during festive months.
- Delivered actionable insights that improved sales forecasting accuracy by 30%.

Employee Attrition Prediction | *Python, Scikit-Learn, Pandas* *May'24*

- Analysed HR dataset of 1,500+ employees to identify key factors influencing attrition.
- Applied Logistic Regression, Random Forest, and SVM models, achieving 85% prediction accuracy.
- Visualized correlations between job satisfaction, overtime, and attrition rates with clear charts.
- Delivered insights that help HR reduce employee turnover risk by 20%.

Credit Card Fraud Detection | *Python, NumPy, Scikit-Learn, Seaborn* *Dec'24*

- Pre-processed 280k+ financial transactions, handling extreme class imbalance using SMOTE.
- Built ML models (Logistic Regression, Random Forest, XGBoost) to classify fraudulent vs genuine transactions.
- Evaluated models using ROC-AUC, Precision-Recall, and F1 Score, achieving 92% fraud detection accuracy.
- Delivered a scalable pipeline reducing false positives by 18%.

Certificates

Python for Machine Learning (Udemy) *Jan'25*
Python for Data Science and Machine Learning | Udemy *Sep'24*
PL/SQL and Data Science Bootcamp (Lovely Professional University) *Dec'24*
Data Science Foundations | IBM (Coursera) *Jul'24*
Advance Python (Infosys) *May'23*
Frontend Development (Free Code Camp) *Apr'23*

Achievements

Team Management: *Apr'24*
Approached peers and created a team for building projects and for participating in competitions.

Lead a Team in Hackathon: *Oct'24*
Led my team in a hackathon, driving end-to-end project development and achieving 80% task completion.

Education

Lovely Professional University Punjab, India
Bachelor of Technology – Computer Science and Engineering *Aug'23 – Present*

Amity International School Lucknow
Intermediate | Percentage: 74% *Apr'22 – Mar'23*

Aditya Vidyashram Puducherry
Matriculation | Percentage: 80% *Apr'20 – Mar'21*
